Typesetting Proof Checklist and Journal Article Template

Articles should be approximately 4,000-5,000 words in length.

This limit does not include titles, subtitles, references, or the abstract.

They should be written as continuous expository narrative in a chapter or article style—not as lists of points or a PowerPoint presentation.

It is important that you thoroughly proofread and edit your article.

Following is our recommended checklist to assist you in submitting the final version of your article for typesetting:

- Check spelling and punctuation line by line.
- Check names of authors and editors in the reference list and cross-check with citations within the body of your article.
- Check the accuracy of citations, quotations, tables and captions to diagrams, illustrations and maps.
- Please provide tables using the Microsoft Word table menu.
- Please refrain from using Word Drawing objects. Figures should be in JPEG or PNG format only.
- Please use **Times New Roman** throughout your article, including tables and figure captions.

Section Heading

The opening paragraph has no indentation. The first letter of the opening paragraph of the article should be in drop case. Your article’s format should follow the format of this template. To use the template, use the original Style Set that we have created for you, which you have downloaded by opening this sample template. The Style Set can be found in the upper right hand corner of the page under the tab “Home” and is listed as “Styles.” If you are using a separate Microsoft document than this one, please first save this style set to your computer by clicking on “Change Styles,” “Style Set,” and then “Save as a Quick Style Set.” Name the style set anything that you like (for example “CGJournalArticleStyleSet”) and then you will be able to access this style set from other Microsoft documents. To access the style set that you saved, click “Change Styles,” “Style Set,” and click on the set that you just saved. To determine which style is used in each section, click on the text in that section. For example, this section is using the “FirstParaOfSectionTextStyle.” Highlight the text that you would like to be formatted, and click on the corresponding Style, and the text will be changed automatically to format according to the style that you press. Please do not alter the margins; they are customized to fit the layout of our typesetting software and are different on odd and even pages for printing reasons. Information in the footer will be updated when the article is typeset.
